

DOBSON KNOB FIRE

NC-NCS-170029
McDOWELL COUNTY

6. INSTRUCTIONS AND ASSIGNMENTS NOT
CLEAR

April 13, 2017

Thursday

Day 0800-2000 hrs.

Night 2000-0800 hrs.

INCIDENT OBJECTIVES	1. INCIDENT NAME	2. DATE PREPARED	3. TIME PREPARED
	Dobson Knob	4/12/2017	2100
4. OPERATIONAL PERIOD (DATE/TIME) April 13, 2017 0800-2000			
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)			
<u>Control Objectives</u>			
1) Providing for the safety of the general public and firefighters through: <ul style="list-style-type: none"> - Adherence to The 10 Standard Fire Orders, - Mitigate the 18 Situations That Shout Watch-Out, - Implement and maintain LCES - Conduct frequent Risk Assessments - Maintaining a 2/1 work rest ratio. 			
2) Contain the Fire: <ul style="list-style-type: none"> - North of the Bald Knob Fire scar. - West of State Road 105 - South of the Over Mountain Victory Trail - East of US 221 			
3) Coordinate with McDowell County Emergency Management and Volunteer Fire Departments to provide Structure Protection as the fire progresses West and North and threatens additional private lands			
<u>Management Objectives</u>			
1) Keep the general public and local officials, as well as incident stakeholders informed of fire status through timely situation updates and personal contacts.			
2) Provide accurate cost accounting and documentation of the incident in accordance with the NCFS Incident Business Handbook and USFS Incident Business procedures.			
3) Ensure that all trainees receive a quality training assignment			
6. WEATHER FORECAST FOR OPERATIONAL PERIOD			
Day Shift conditions: Temp 71 RH 46 Winds NW @ 5-6 then becoming light Night Shift conditions: Temp 51 RH 71 Evening winds light & variable			
7. GENERAL SAFETY MESSAGE			
<ul style="list-style-type: none"> • Drive with headlights on. Drive defensively on curvy roads and trails • Ensure LCES are in place and maintain 10's and 18's • Maintain safe distance when working with heavy equipment • Beware of steep slopes, rough terrain, and cliffs

621 PM EDT Tue Apr 11 2017

Forecast is based on request time of 1800 EDT on April 11.
If conditions become unrepresentative...contact the National Weather Service.

.DISCUSSION...

A weak cold front will pass through the region on Wednesday, producing scattered showers and isolated thunderstorms. High pressure behind the front will keep most of the area dry, however isolated diurnal showers are possible through Saturday. Another weak cold front slowly moves through the region early next week with another round of scattered showers and thunderstorms.

WEDNESDAY...

Sky/weather.....Mostly cloudy (70-80 percent)...then becoming mostly sunny (35-45 percent). A chance of showers.

Max temperature.....Around 71.

Min humidity.....46 percent.

Wind (20 ft).....Northwest winds 5 to 6 mph in the morning...becoming light.

Mixing height.....400-1800 ft AGL...increasing to 4900-5800 ft AGL.

Transport winds.....North 6 to 15 mph.

Smoke dispersal.....Poor to good (3100-50300 knot-ft).

LVORI.....4.

ADI.....8...increasing 52 early in the afternoon... decreasing to 40.

Stability class.....3.

Pcpn amount.....0.04 inches.

Ceiling (FT).....4500...increasing to 6000 in the afternoon.

Visibility (SM).....7 until late afternoon.

Sfc pressure (in)...27.89.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2	TYPE OF FIRE: Wildfire
FIRE NAME: Dobson Knob Fire	OPERATIONAL PERIOD: 4/13/2017 Day
DATE ISSUED: 4/12/2017	TIME ISSUED: 1900
UNIT: USFS Grandfather District	Signed: John Cook FBAN <i>John Cook</i>

WEATHER SUMMARY: Sunny and warm with very slight chance of afternoon showers. Moderately stable atmosphere. Low humidity overnight.

Max Temp: 70° **Min RH:** 46% **Winds (20'):** E@4G10 then S@4G5 **Sky Cover:** Clear
Mixing Height: 5,200' **Ventilation Index:** 35,000 **ADI (1-100):** 34 fair **Fuel Shading:** 20% **Slope:** 20-30%

FIRE BEHAVIOR

FUELS: The predominant fuel types in the Dobson Knob Fire area include hardwood leaf litter (FM 9) intermixed with dead and downed fuels (FM 5 and 11 or SB2 - Low Load Blowdown) due to overstory mortality created by pine beetle infestations. Pine ridge stringers are burning easily. Thick areas of Rhododendron (TU5) are present in the understory and burn readily when aligned with slope. Both Burning Index and Energy Release Component are below the 90th percentile (based on the Grandfather RAWS)

1 hour fuel moisture: 7% (-1); **10 hour fuel moisture:** 8% (-3); **100 hour fuel moisture:** 12% (-1)
Energy Release Component: 30 (+2) (Fuel Model G 90th percentile is 41, 97th percentile is 46)
Burning Index: 35 (+2)
Probability of Ignition: 60% **Forecasted KBDI:** 62 (+11)

Expected Fire Behavior:

Timber Litter (FM9): 2' (same) flame length and Rate of spread 5 ch/hr (+1) on a 20% slope
Rhododendron (TU5): 5' (+3) flame length and Rate of spread 5 ch/hr (+1) on a 20% slope

Local Thresholds: (bold are present) eyelevel winds over 4 mph, RH below 25% and **Temp > 60 deg**

SPECIFIC: Low overnight humidity will allow quick drying of fine fuels and earlier active fire behavior. Shifting wind direction through the day will create a constantly changing situation. Fire behavior will generally be higher than yesterday due to decreased cloud cover. Wind and slope will align today for increased upslope spread on south and west facing slopes in the afternoon.

DIV C: Early east wind will push the line and keep smoke on the line through the morning.

DIV J: Late south wind will push the line in the afternoon during peak conditions, increasing spotting potential from yesterday's burnout. Smoke will also cover the line in the afternoon.

DIV S: General light east wind in the morning will battle upslope winds as the day progresses creating an erratic situation along the ridge.

DIV Z: South winds will peak in the afternoon and will be conducive for burning out.

AIR OPERATIONS and SMOKE FORECAST:

Inversion burn off around 0900 and then slowly lifting.

SAFETY

Watch Out #16: Getting frequent spot fires across the line

Spotting has occurred during burnouts and long after. Fuels are very receptive and our conditions have not improved. Be sure to keep monitoring across the line.

Safety Zone Separation Distance from Flame: 20' or 1/10th acre

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Dobson Knob Fire

DATE: 4/13/17

TIME: 0800-2000

Major Hazards and Risks:

STEEP TERRAIN- Rock faces are “VERY DANGEROUS” throughout these areas! There is no reason to approach rock faces due to fall hazard. Maintain communication with all crew members at all times; Watch footing and maintain your spacing. Refer to IRPG pg 3-4.

COMMUNICATIONS- There are several different radios and frequencies being used on the incident. Make sure your radio is programmed correctly. Check the Divisional Assignments Page for your correct operational channel.

DRIVING – Drive defensively while leaving the ICP. Use passenger as a lookout, navigator, and backing guide. Obey posted speed limits and use seatbelts. Slow down to a safe speed while driving in smoke or dusty road conditions and use headlights for added visibility. When meeting oncoming vehicles slow down and give them the right-away. Keep your windows clean.

SNAGS- Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazards. Refer to pages 22-23 in the IRPG Guide.

INDIRECT FIRELINE- Use indirect attack; burnout as possible. Refer to IRPG pg 6.

ESCAPE ROUTES & SAFETY ZONES- LCES, ESTABLISH and IDENTIFY safety zones and escape routes. Know where these are located and the route to them. IRPG pg 7.

UNBURNED AREA/ REBURN POTENTIAL- LCES; utilize Air Attack if available. Know predicted weather and fire behavior; post lookouts as needed.

EXTREME CONDITION- LCES; establish trigger points; maintain situational awareness; establish lookouts as needed.

FIRE BEHAVIOR- Maintain situational awareness, follow 10 Standard Orders, recognize / mitigate the 18 Watch Out Situations, and apply LCES. Know the fire weather forecast. Monitor conditions.

Accidents: Contact your supervisor and inform him/her. Follow emergency procedures at bottom of medical plan.

*****Conduct Tailgate Safety Briefings**

Briefing Checklist Inside Back Cover of I.R.P.G.

IAP Information Talking Points

Thursday, November 17, 2016

- **Media visiting the ICP are to park in a designated area, flagged and marked with signage. If you see unescorted media in Base Camp, please contact the ICP Fire Information Center at 828-513-2500 (or 336-455-9641), or call for INFORMATION over the radio, or use your smartphone to email us at partyrockfireinfo@gmail.com.**
- **We are all “ambassadors” on the fire. Your communication to walk-up customers speaks well of our firefighting community. Thank you for taking a moment to answer questions posed or call the ICP Information Center for an assist with their inquiry.**
- **The Information Center has been relocated behind the ICP adjacent to the Medical Unit tent. The Liaison is also working in the Information Center.**
- **When East Meets West → Think about it. NC’s firefighters annually head west to the Rockies and beyond to assist with wildfires. Now the favor is being returned, when we need it the most. So welcome some old friends made from dispatches past and invest in some new friendships too.**
- **Party Rock Fire information is posted on INCIWEB should your friends and family want to keep up with your firefighting efforts.**
- **Have a safe and productive day!**
